

Job Description

Job Title: Applications Engineer : CFD

Location: Cambridge

Salary (Benefits): £Competitive

Closing Date: January 31st 2012

The Company:

Our client provides software solutions for multiphysics modelling. They are a fast growing high tech engineering software company with a proven track record and a vision as a leader of the industry.

Duties and responsibilities:

- Provide technical support for users of the software in the field of computational fluid dynamics.
- Give product demonstrations at seminars, workshops, conferences, and meetings with customers.
- Work with customers to provide appropriate technical and business solutions.
- Act as instructor at product training sessions.
- Work collaboratively with development engineers and participate in product development.

Skills and Qualifications:

- M.S or Ph.D. in engineering, physical sciences, or life sciences.
- Experience with mathematical modelling.
- Business oriented.
- Genuine interest in mathematical modelling, computational physics, and related software simulation tools, particularly within the fields of chemical engineering and heat transfer.
- Strong attention to customer service.
- Strong written and verbal communication skills.
- High energy, self-motivated, quick study with positive attitude, flexible nature and goal-oriented work habits

Application Method: CV and Covering Letter to Jacob.gray@namtec.co.uk
