

## Job Description

**Job Title: Mechanical Engineer – Deep Hole Boring / Turning**

**Location: Leighton Buzzard**

**Salary (Benefits): £20,000 + depending on experience**

**Closing Date: 31<sup>st</sup> January 2012**

### **Duties and responsibilities:**

Responsibility for the safe efficient and profitable setting and running of a wide variety of machines including implementing best practice, machinery maintenance and assisting with improvements to the process, tooling and all related equipment.

Quality and productivity of the highest standard is required. As a company, we are willing to invest, adapt and change in order to ensure this can be achieved to the highest level.

### **Skills and Qualifications:**

A positive, self motivated and fully experienced mechanical engineer with a thorough and extensive knowledge of machining a wide variety of materials including all steels and exotic alloys.

Previous experience of deep-hole boring or horizontal boring and / or turning would be a distinct advantage.

**Application Method:** CV and covering letter to [jacob.gray@namtec.co.uk](mailto:jacob.gray@namtec.co.uk)
